

# High Density Rackmount Protector

## RMP300XLBET Protector

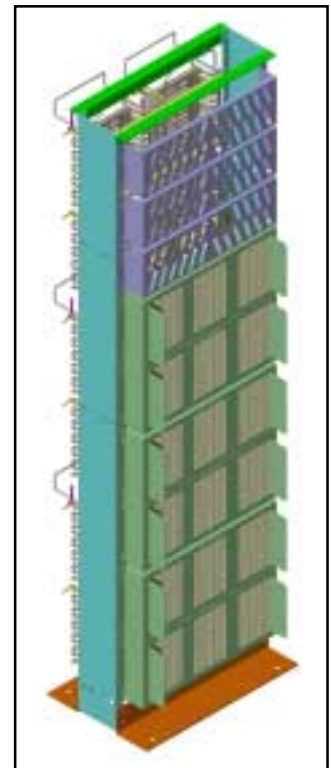

Circa's high density, space saving, 300 pair rackmount protector can be mounted 6 units high allowing for up to 1800 pairs of protection on a standard 7 foot tall, 23 inch rack or 2400 pairs without the cross-connect field. A complete ready-to-assemble rack can be ordered or all parts can be ordered individually to accommodate custom design builds. Custom cable stub lengths are also available upon request.

### Features & Benefits

- accommodates industry standard 5 pin protector modules
- Amphenol (RJ21) connectors are available on a mounted plate for quick connection to the telephone system from the 300 pair cross-connect 110 block.
- includes the necessary hardware for mounting the protector and 300 pair 110 or Bix block with wire management (small or large wire management available)
- external ground lug for building ground connection
- designed to exceed the requirements set forth in Underwriters Laboratory's UL497
- custom cable stub lengths available upon request
- 26 AWG swivel stubs serve as fuse links
